PERSONAL STATEMENT

Hello, my name's Tyler and I'm a multidisiplinary user experience designer who enjoys crafting innovative user experiences across multiple platforms. My passion for design and constant desire to find new ways to solve unique problems has allowed me to lead a life full of new experiences, each teaching me valuable lessons.

I use everything I've learned to gain a deep understanding of users and to find unique solutions to satisfy their needs. I take pride in my ability to help people, no matter their struggle.

During my experience in the tech industry I've created products that are viable for the business while remaning desirable to it's users.

EDUCATION

-  Classic Cars
-  Custom Vinyl Designs
-  Video Games
-  Fitness
-  Music
-  Glass Etching

EXPERIENCE

Product Developer

Dominion Enterprises

As a product developer conducted user reasearch that would guide me to creating products that had optimal benefits for the business as well as the users. I also lead a major redesign of the company Android app and recovered a failed iOS app.

User Experience Designer

Dominion Enterprises

As the user experience designer I was creating thoughtful and intuitive designs that rendered flawlessly on numerous platforms.

Freelance Designer

Self Employed

Now I was learning how to work with a client as a one man team. I had to fully understand my clients and their needs to deliver successful designs.

Creative Team Intern

Davis & Company

Here's where I begin my journey of creating computer generated graphics. I was creating campaigns that remained coherent across multiple platforms on a fixed budget.

Athletic & Personal Trainer

Bodytech

Picking up personal training in my free time was driven by my desire to better understand people's problems and figure out unique solutions to help them. Every client is different and needs a unique program and I'm there to help them create it.

Cement Mason

Conoco Concrete

Throwing myself back into the world of manual labor once more I took on numerous responsibilities. I was guiding each project from an idea to a beautiful finished concrete hardscape.

Cashier

Harris Teeter

My first experience dealing with people face to face on a daily basis. I learned how to deal with the most polite customers as well as the outraged "Apples are how much!!!" customers.

Mason's Hand

Creative Exteriors

A tough first job that gave me an outstanding work ethic and gave me my first experience of designing something amazing from a blank canvas.
